Address: Hà Nội

CAREER OBJECTIVE

Final-year Information Technology student with a solid foundation and hands-on experience in Web Development. In the short term, I am seeking a Backend Developer Intern position to apply my academic knowledge, enhance my specialized web programming skills, and contribute effectively to the company's real-world projects. In the long term, I aim to advance my career into a Full Stack Developer, transition into a full-time employee, and make significant contributions to the company's growth and success.

EDUCATION

10/2022 - 8/2026

East Asia University of Technology

Information Technology

Coursework: Focused heavily on core computer science and software engineering subjects, including Data Structures & Algorithms, Database Management Systems, Object-Oriented Programming (OOP), and Web/Mobile Application Development.

Key Achievements:

- Self-studied and successfully applied modern tech stacks to build practical, end-to-end personal projects.
- Successfully delivered multiple academic software development projects, demonstrating strong hands-on coding and system-building capabilities.

WORK EXPERIENCE

7/2025 - 10/2025

DMC Energy Joint Stock Company

Backend intern

- Designed and developed high-performance RESTful APIs to seamlessly integrate AI models into the real estate application, optimizing data payloads to minimize latency and ensure real-time responsiveness.
- Built a scalable, automated web scraping pipeline to harvest extensive datasets from multiple major real estate platforms; engineered and optimized complex database schemas to ensure data integrity and seamless synchronization.
- Analyzed market trends and implemented interactive data visualization dashboards, providing actionable data-driven insights to support the product development team.
- Responsible for developing a key component of the core backend logic using clean code principles and design patterns, successfully optimizing complex real estate algorithms for high stability and future scalability.

PERSONAL PROJECTS

11/2025 - 12/2025

ONLINE MANGA READING PLATFORM

Role: Full Stack Developer
Project Description: Developed a modern online manga reading platform focused on optimizing the reading experience for users and providing a robust Creator Studio (dashboard) for content contributors.
Key Features:

- User Experience: Implemented a seamless reader interface with *Lazy Loading* to optimize bandwidth; integrated automatic reading history tracking and a real-time commenting system.
- Creator Studio: Built a management dashboard that supports bulk chapter uploads with automated file renaming/sorting and features interactive charts for tracking user engagement metrics like views and follows.
- Core System: Implemented secure user authentication, profile customization, and an intelligent search bar with dynamic suggestions.

Tech Stack: Next.js (React Framework), Tailwind CSS, Supabase (PostgreSQL, Auth, Storage), Recharts, Heroicons.

Github: <https://github.com/vietbui204/website-manga>

4/2026 - 5/2026	MOBILE MANGA READING APPLICATION Role: Full stack developer Project Description: Designed and developed a cross-platform mobile application for reading manga, adhering to standardized architectural patterns, optimized image loading speeds, and a scalable backend system. Key Features: • Mobile App Development: Applied <i>Clean Architecture</i> and the <i>BLoC</i> pattern for robust state management; engineered a highly responsive UI with advanced search features and a personalized user library. • Backend & Database Engineering: Designed a high-performance RESTful API connected to a PostgreSQL database via Prisma ORM; configured advanced pagination to handle large datasets seamlessly. • Storage & Performance Optimization: Integrated Cloudflare R2 Storage for secure and scalable chapter image delivery; optimized backend efficiency using caching mechanisms. Tech Stack: Flutter (Dart), BLoC, Dio, Retrofit, Node.js (Express), TypeScript, Prisma ORM, PostgreSQL, Cloudflare R2. Github: https://github.com/vietbui204/reading-manhwa-app
-----------------	--

SKILLS	
Technical Skills:	Proficient in HTML5, CSS3, and JavaScript (ES6+). Hands-on experience in building web/mobile applications using ReactJS, Next.js, Flutter, and Node.js. Proficient in database design and management: MySQL, PostgreSQL. Experience in deploying and managing cloud services (Supabase, Cloudflare R2 Storage).
Soft Skills:	Teamwork & Collaboration: Experienced in team workflows using Git/GitHub; strong task management skills with a proven track record of meeting project deadlines. Problem-Solving: Strong logical thinking, highly adaptable to new technologies, and resourceful in applying practical solutions to technical challenges.
Languages:	English: Proficient in reading technical documentation, researching development concepts, and handling basic professional communication.
